• PROFILE

I am a beginner data scientist with over 10 years of experience in architecture and interior design. My passion for digital transformation and smart city technologies led me to pursue a career in data science, and I recently completed a data science bootcamp to gain the skills needed to enter this exciting field and I keep learning and expanding my skill set. As a collaborative problem-solver with a proven track record of delivering successful projects on time and within budget, I am confident that my unique blend of skills and experience will enable me to make a valuable contribution to any team.

★ PERSONAL PROJECTS

Genshin Impact Party Wiki

March 2023

A web page that will help Genshin Impact players create the perfect party for their battles, allowing me to apply my data science skills to a fun and engaging real-world problem.
